Rayvolution

a chaise longue design

the revolution in relaxing, in the light of the sun

Rayvolution is an innovative bed that gently rotates towards the sun using integrated solar cells. The alignment is automatic and extremely precise, guiding the user on a pleasurable and relaxing tanning experience, all day long.

Rayvolution is a custom-designed chaise longue for maximum comfort. The sturdy construction is made of wood and steel, completely "Made in Italy". The curved lines of the bed are pleasant to the eye, with maximum attention to detail placed in designing this artisanal piece. The chair is fully customizable, with different colors, patterns and textiles available. Personalized branding and logos are also possible.

Rayvolution is glamour. At sunset, eye-pleasing lights at the base and on the remote control are activated.

Rayvolution is "My Rayvolution", personalizable with a series of options: a refreshing water spray, a table for work or reading, manually controllable inclination, and an audio-video system.

Rayvolution

for maximum relaxation,

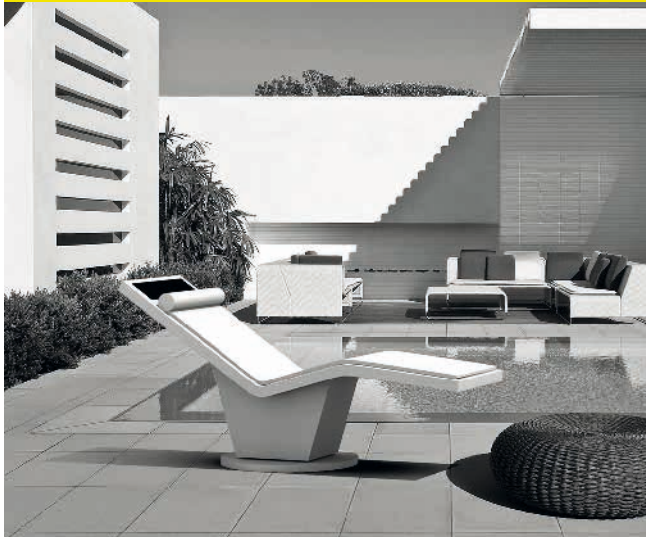

letting one be carried towards the warmth of the sun

RAYVOLUTION

For maximum relaxation,
letting one be carried towards the warmth
of the sun

In the middle of a voyage,
on the quest to find
the sun

Elegance with zero environmental impact,
a trendsetting way to feel
part of nature.

Wherever you are in the world
and however the bed is positioned,
it knows how to find the path of the sun
